CAREER OBJECTIVE:

Willing to work hard in an IT-based company as a Front-End Developer. I am fully committed to learning any new technologies for this field of company demand. I have enough experience in Back-End Development.

ADDITIONAL SKILLS:

- ❖ **Expertise:** HTML, CSS, Bootstrap, JavaScript, ES6, React, JSON, Web API
- ❖ **Intermediate Level:** Node JS, MongoDB, React Native, JQuery, Firebase, Heroku, Netlify
- ❖ **Basic Level:** Redux, Reducer, SASS, Next JS, Rechart
- ❖ **Tools:** VSCode, Git, Node
- ❖ **Github:** <https://github.com/mahfuz-antor>

PROJECT EXPERIENCES:

❖ **Mohanonda IT (IT Service Provider Project)** (Date:14-04-2021 To 17-04-2021)

- **Live Site Link:** <https://my-complete-project-25e25.web.app/>
- **Server Site Link:** <https://github.com/mahfuz-antor/mohanonda-IT-server>
- **Client Site Link:** <https://github.com/mahfuz-antor/mohanonda-IT>
- **Technologies:** HTML, CSS, Bootstrap, JavaScript, React JS, Node JS, Express, Mongo DB, Github, Heroku, Firebase.
- **Features:** It is an IT service-based full-stack website. A customer can book a service and can give a review of this site. An admin can add service, add admin, delete service, and update booking status. In this project, Google login must be used for everyone. Finally, the admin panel is protected.

❖ **Fruits Village (Fruits Shop Project)** (Date: 31-03-2021 To 02-04-2021)

- **Live Site Link:** <https://full-stack-client-site.web.app/>
- **Server Site Link:** <https://github.com/mahfuz-antor/fruits-village-server>
- **Client Site Link:** <https://github.com/mahfuz-antor/fruits-village>

- **Technologies:** HTML, CSS, Bootstarp, JavaScript, React JS, Node JS, Express, Mongo DB, Github, Heroku, Firebase.
- **Features:** Fruits shop site. Here anyone can buy fruits, add fruits details for sale, delete fruits details and see orders details information. Each user must be login with a Google account.

❖ **City Travellers (Tour Service Provider Project)** (Date: 19-03-2021 To 21-03-2021)

- **Live Site Link:** <https://react-auth-09.web.app/>
- **Code Link:** <https://github.com/mahfuz-antor/city-travellers>
- **Technologies:** HTML, CSS, Bootstarp, JavaScript, React JS, Github, Heroku, Firebase.
- **Features:** Urban citizens can get tourism services from this site. A customer can easily book vehicles and see his order details by using a Google login.

SELF ASSESSMENT:

- Creative Thinking
- Curious to Learn
- Organized
- Time Management
- Self-Motivate
